

# Wanderlust

Team 10: Christina Sakellaris, Connor Settle,  
Juan Hernandez, Lance Lamore, Shana Hadi

# About and Motivation

Wanderlust is an app that helps runners and bikers find new routes for their daily exercise.

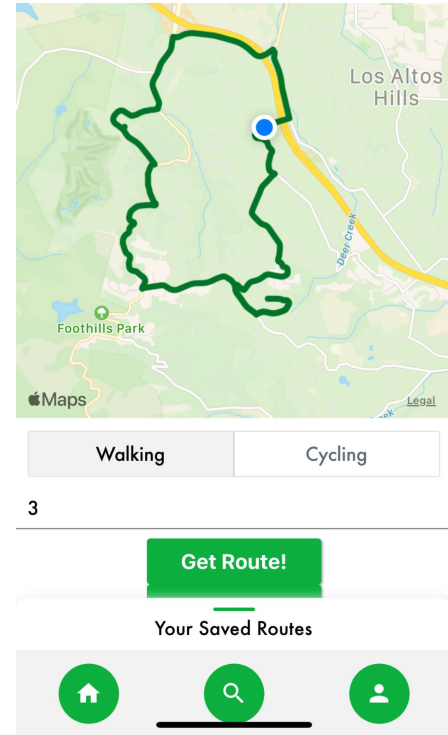

Wanderlust is for those who wish to add some **whimsical fun** to their daily runs & bike rides.

The app accepts a user's **location** and desired **distance**, and will generate a semi-random route for the user to take for their run!

# Generating Routes

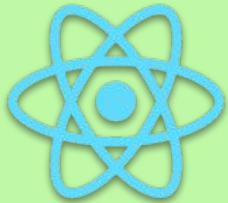

- First **create an Account** so that Wanderlust can save and customize routes to your desires.
- Select whether you want to **bike or walk** and what distance you would like to travel.
- Routes are great if you are traveling to a new area, or you simply want to get to know your location better.

# Technical Details

## React Native

Application  
framework

## Firebase

Backend  
functionality

## Google Maps API

Location + maps

## Expo, XCode, Visual Studio Code

Building, Testing, IDE

# Try It Yourself (during the demo)

Make Sure you have **Expo go** downloaded on your ios or android device
